If it's not Cool or Cosy your ceiling insulation may not be working as advertised

Some ceiling insulations in Australian homes are not working as they should due to incorrect installation.

So for many homeowners it means you've paid your money, but you're not getting the full advertised benefits of reduced power bills and increased comfort levels.

An incorrectly installed R3.0 glass wool batt with only a small, say 2mm gap, will reduce the batt's performance by 50% to R1.5.

Cool or Cosy Performance Guaranteed
INSTALLED WITHOUT GAPS

- * No gaps means no loss of performance
- * Installed by trained professionals
- * Includes a lifetime guarantee

Cool or Cosy's unique performance guarantee ensures that your insulation will be installed with NO GAPS, and in accordance with all relevant Australian installation standards.
